

Top Coat was incorporated in the State of Texas in March of 1980. At inception, Top Coat's main line of business was industrial painting. In 1981, Top Coat began performing maintenance services for several oil and gas producers.

After a few years working offshore, Top Coat began to perform construction services as well as painting and maintenance. Our list of clients now numbers in the hundreds, offshore and onshore. For the last few years the bulk of our offshore business has been the installation of gas compressors, platform hookups, platform upgrades, and platform decommissioning.

Onshore, however, our fabrication ability has grown enormously through the fabrication of multiple structures weighing up to 50 tons each as well as stainless and carbon pipe fabrication jobs with spools numbering in the thousands.

Our company is very strong financially and has an outstanding credit history. Our debt load is extremely low with a significant credit line at our disposal.

Top Coat has committed itself to long term planning and growth. In the many years that we have been in business, we have generated ever-climbing sales and profits. The long-term goal is continued growth through diversification and a quality reputation.

Offshore

Installations: Turn-key service for installations and hook-ups including hammer crew, lift-boat, supply vessels and personnel.

Before and after installation of deck, heliport and boat landing.

Removals: We provide all equipment and personnel to decommission platform and prepare for removal.

Maintenance: We provide crews and equipment for:

- grating & handrail repair
- flowline repair/fabrication
- all structural welding/fabrication
- vessel cleaning
- sandblasting/painting
- heliport skirt repair/replacement*
- storm damage repairs
- MMS required repairs

**Top Coat has tools that allow for removal and replacement of heliport skirts without a liftboat when a crane is not accessible.*

Fabrication

Structural

- Heliport skirts
- Handrails
- Ladders/cages
- Stairways
- Boat landings
- Deck extensions
- Heliports
- Large ship components
- Satellite platforms
- Any other structural component requested

Top level pipe racks for Jones Act Tankers.

Pipe

Stainless pipe spools loaded on barge for bulk shipment.

- Flowlines
- Carbon Steel
- Stainless
- Risers
- Screw pipe
- X-ray/Hydro

Top Coat has multiple fabrication shops on 32 acres giving us the space for fabrication of any size project. We are located on the ICW which allows for load-out of large projects directly to a barge or supply vessel.

Top Coat also supplies in-house sandblasting and painting which allows us to send our customers a finished product.

Dock Services

Aerial view of dock, fab shops and laydown areas.

- 1,700 linear feet of dock space
- Fuel/Water/Lube sales
- Crane/Forklift services
- 2 miles from Freeport jetties
- No height restrictions
- Material storage
- 24-hour service
- On-site helipad
- Dispatcher hook-ups
- Minor welding repair on vessels
